

CONFIDENTIAL AUTO ACCIDENT INJURY REPORT

“ This FREE REPORT You Requested Reveals Little Known Information About Hidden Injuries That Most Doctors & Insurance Companies Will Never Tell You!....So Read On To Learn Of This Secretly Uncovered Information That Could Save You THOUSANDS OF DOLLARS And Your Health!”

Regardless of Who’s At Fault, This Is Important Info That Could Affect The Rest Of Your Life!

IN THIS INSIDER’S REPORT, YOU’LL LEARN:

- *How to get the information you need so you know if you have a “Soft Tissue Injury” or not!*
- *Why your medical doctor is praying you don’t read what’s in this report!*
- *How to end the pain and suffering right NOW, and FOREVER!!!*
- *What will likely happen if you don’t get natural treatments NOW!*
- *The Most Common Myths About Auto Accidents.*
- *And much more!*

WARNING: “ SOFT TISSUE INJURIES” are sneaky, and are potentially debilitating injuries that will strike millions of Americans this year...and as a result, many of them will suffer for the rest of their lives due to misinformation and inappropriate care! That’s the Bad News.

The GOOD NEWS is that you don’t have to continue suffering! Keep reading this report to find out the well-hidden truths you won’t find anywhere else!

Florida Doctor and “Soft Tissue Injury” Authority says.....

“Soft Tissue Injuries are often Misunderstood, and

difficult to detect. Many victims who go to doctors due to pain, are told that they will need rest and time. Rest and Time alone, can, and usually does create scar tissue and permanent damage!”

Dear Friend,

You've been in an auto accident. You're worried! You're stressed! Your life is disrupted. You can't believe it. An accident couldn't have happened at a worse time!

Did you know that one of the most stressful aspects of living modern day life is dealing with the problems that arise after an automobile collision?

Now on top of you're career and home life, you have to go through the hassles of dealing with insurance companies, getting your car fixed, re-arranging all your appointments, and finding a way to get around without your car. You're busy! You don't have time for all of this.

Why did this have to happen to you now?

If you tune into the local news, all you hear about anymore is the # of automobile accidents, the road rage, the driving age debate, the stat of rush-hour traffic. To say Florida has a lot of automobile accidents is an understatement!!!

You can't get into a car and drive without seeing the following: people on their cell phones, people changing C.D's, people stopping at the drop of a dime to "Rubberneck" at other accidents that have already taken place on the side of the road. Next thing you know..... **BAM, SMASH, SHATTER!**

Are you aware that after an automobile accident, even after a fender bender, you may have suffered from a **SOFT TISSUE INJURY** that may not be noticed or detected for months or even years to come?

The National Highway Traffic Safety Administration reported "A 10 Mile Per Hour Rear End Collision Is Equal To The Occupant/Driver Catching A 200lb. Bag Of Cement Dropped From A Second Story Window!"

The truth of the matter is that your head can move up to 4 times the speed of impact in a split second. So that little 10 mph fender bender may

have snapped your neck and spine back and forth at 40 mph ripping and tearing ligaments, muscles, nerves, and other "SOFT TISSUES." Often, with no visible injury being felt until ARTHRITIS cripples you 7 or 8 years down the road.

As a result, a lot of accident victims settle their case with the insurance companies before getting properly evaluated from a doctor trained in SOFT TISSUE INJURIES.

THIS COULD BE A HUGE MISTAKE!!!

Why? Because once you settle your case, you lose the right to seek care if you need it. You have to remember, the Insurance Agent you contact to report the accident to **DOES NOT** work for you. They work **FOR THE INSURANCE COMPANY!** They want you to settle as early as possible, many times before you get care, **so they can save their company \$\$\$! You pay all of this \$\$\$ for your premiums, but they want to pay as little as possible for this accident! WELCOME TO THE INSURANCE BUSINESS!!**

A good rule of thumb is to get educated in your rights, then make a decision. There is no reason to rush; it can only hurt you.

It is our position if you were indeed injured, to allow you to get the care you need to get back to the way you felt prior to the accident, so you don't have the ill life limiting effects of pain and arthritis later on down the road. **IT WILL HAPPEN!!!**

KNOWING YOUR RIGHTS IS IMPERATIVE AT THIS POINT!!!

Now it is not the responsibility of the insurance company to pay for anything more than that. They are not responsible for pre-existing injuries; only for the injuries sustained in the accident. **Waiting around to see if you have pain or until the pain goes away will cost YOU dearly...LITERALLY!**

Even if you are just sore, you should get checked out immediately. Because you may experience pain, numbness, headaches, muscle stiffness, fatigue, and other problems including arthritis many months down the road.

Remember **NOTHING** is more important than your health, especially when you start to lose it!

*Here's where the problem begins....*Most people who suffer from an auto accident have one thing on their mind: **THEIR AUTOMOBILE!**

Common questions include: "Who is going to fix my car?", "Will my insurance rates go up?", "What will I drive in the meantime?", "Who will pay for all this?"

AND THE LAST THING ON THEIR MIND IS:.....
.....**"AM I REALLY OK?"**

Not only are auto accidents an inconvenience and a hassle, a common general

complaint of auto accident victims is that they don't feel their normal self.

You may be experiencing obvious symptoms and pains or worse than that, you may be injured and feel nothing at all.

Either way, did you know that auto accidents can cause post traumatic osteoarthritis?

Osteoarthritis can ruin your posture (giving you a slumped or humped back appearance.) Osteoarthritis can cause the discs in your spine to degenerate and create scar tissue formation that can lead to chronic stiffness and the inability to move properly.

When this happens, simple tasks like turning your neck become painful and almost impossible.

Let me make this perfectly clear. The emergency technicians (doctors, nurses, aides, etc.) are trained to detect life threatening injuries and provide appropriate care as needed.

If your injuries do not fall into this category, then after the evaluation, you'll be sent home with pain and sleep medication and muscle relaxants.

These may make you feel better and provide you relief for the short term,

BUT WHAT ABOUT THE LONG TERM EFFECTS??

“Your doctors are finished, and your pain will eventually go away on it's own!”

WILL IT??????????

Hey that's not the doctors problem, that's your problem that you have to deal with, LIVE WITH IT!

AU CONTRAIRE!!! Absolutely Not!!! WRONG ANSWER!!!

**Remember, the purpose of medication is to “numb the pain”
not correct the injured problem.**

**Most Doctors Are Not Trained In The Detection Of These Hidden
Injuries....And That's A Fact!**

Read The Following Information And Find Out More!

How Are These Injuries Detected?

First, when you have been in an auto accident, you need a doctor who is trained and specializes in the biomechanics of the human body. That means he or she can perform routine physical examinations with orthopedic and neurological tests, as well as special tests that assess those hidden functional soft tissue damages. In addition, special x-rays can be taken to find out if there has been any structural damage.

As a matter of fact, most general practitioners do not conduct these specific examinations and x-ray analysis methodologies. Without proper training, a doctor can overlook many damaging injuries resulting from a condition called **WHIPLASH. WHIPLASH OCCURS WHEN THE HEAD AND NECK ARE THROWN OR “SNAPPED” BACK AND FORTH VERY QUICKLY AT SPEEDS SLOW AS (ARE YOU READY FOR THIS.....) 5 M.P.H.** Whiplash is the most common injury in auto accidents.

“About 20 Million People In The United States Have Suffered Whiplash Damage!”

Your neck is jam-packed with nerves, glands, tubes, blood vessels, lymph nodes, and 48 different joints. Add to that, your brain stem, spinal column, discs, muscles, tendons, ligaments, fluids, meningitis, and more!

The Chances Of You Becoming A Whiplash Victim In An Auto Accident Are Extremely Good.

In addition to the discs and other soft tissue damages, whiplash causes spinal column misalignment and irritation, stretching, or impingement to the nerves and spinal curve

Proper evaluation and treatment by an injury specialist can make the difference...

True Recovery, Healing & Strength Vs. Lingering Pain, Sickness and Disability

Hello! & Welcome To FLORIDA CHIROPRACTIC CLINICS,
We have treated numerous injury victims just like you. Our Doctors are well trained in the diagnosis and treatment of auto accident patients.

Numerous patients have entered our offices after a car accident, whether it being after they were sent away from the emergency room following up after their injuries were still affecting them, or even if they were not experiencing any pains or symptoms at all. They felt fine!! They just wanted to be sure they were all right.

I'm sure you are wondering if you will be alright or if just want to bypass all of the

rigormorall and say, OH I'M FINE! IT WAS JUST A FENDER BENDER!"

LET US ASK YOU THIS, "Isn't it better to be safe than sorry?"

Our offices use the state of the art newest procedures developed to check and see if you were really injured after this accident. We utilize a **MANUAL MUSCLE TEST**, which is a form of diagnostic testing that identifies and monitors neck and back soft-tissue injuries as well as structural injuries. Currently our offices are one of the few facilities in Florida that utilize **MANUAL MUSCLE TESTING** in order for you to see right before your eyes, what has taken place in your condition.

WHAT IS MANUAL MUSCLE TESTING?

Whenever your body undergoes an injury, your nervous system, muscles, ligaments, and vertebrae are affected. It decreases your body's ability to perform it's every day functions. The **MANUAL MUSCLE TEST** is performed by testing the strength of one isolated muscle. If you have an injury, there is an inability of your body to perform up to it's full capability. Thus when this isolated muscle is tested, you will not have the proper strength to resist the low amount of pressure placed on it verifying that there is a problem and an injury present.

This **SHOCKING MANUAL MUSCLE TEST** will **WOW** the socks right off of you. **REVEALED RIGHT BEFORE YOUR EYES**, you will see the stress your body has endured from the injury and the **GREAT RESULTS YOU CAN LOOK FORWARD TO!!!** There's **NO DISPROVING THIS!** **ONCE YOU SEE WHAT THIS INJURY HAS DONE TO YOU & THE WAY YOUR BODY HAS DETERIORATED, & WILL CONTINUE TO DETERIORATE**, it will leave you wondering why you have waited this long and why you haven't pursued this avenue of relief before!

WHETHER THE ACCIDENT WAS YOUR FAULT OR NOT, THE LIKELIHOOD OF INJURY IS GREATER, NOT LESS, THAN MOST OF US THINK. THERE ARE MANY POLITICALLY AND INSURANCE DRIVEN MYTHS OUT THERE THAT HAVE LITTLE TO DO WITH THE REAL FACTS. WE'RE TIRED OF WATCHING PEOPLE LOSE THEIR HEALTH WHEN THEY DON'T HAVE TO. THAT'S WHY WE PUT TOGETHER SOME MYTHS AND FREQUENTLY ASKED QUESTIONS ABOUT AUTO ACCIDENTS.

Myth#1: All people fake injuries to collect money.

FACT: *The time and hassle required to pull this off are so great, only true con-artists and criminals ever try. Before paying a claim, the insurance companies will always check to verify if it's legitimate. Unfortunately, there are people out there who rip insurance companies off, but if your case is legitimate, don't let the bad apples ruin your rights*

Myth #2: If I don't feel pain right away, then I'm probably fine.

FACT: *Soft tissue injuries to your neck and your back can go weeks or months before you start feeling headaches, neck pains, or back pains. Other things like stiffness may not show up for years. There are few people out there who have the training and experience to determine if you are injured because* **NO PAIN DOES NOT NECESSARILY MEAN, NO INJURY!**

MYTH #3: Children don't get hurt in car accidents because they are young and flexible.

FACT: *Children get hurt all the time in car accidents, and are thought to be fine because they don't complain about it or know how to express what they are feeling. Your child can easily be injured in a car accident, (the same as you can) and should also be checked for soft tissue injuries following your accident. Imagine if your child grew up with a hidden injury that didn't present itself until later on his life and it burdened him the rest of his life. COULD YOU LIVE WITH YOURSELF AS THE PARENT?*

MYTH #4: The Emergency Room Doctor Released Me So I Must Be Fine.

FACT: *The evaluations done by the emergency room doctors are only meant to ensure you that you didn't suffer any serious immediate injuries like broken bones, abrasions, lacerations, or concussions. Most of these doctors do recommend follow up care to make sure they didn't miss anything. Also, any x-rays they take are to rule out broken bones. They do not show soft tissue injuries well.*

HERE ARE SOME COMMON ASKED QUESTIONS:

Q: What if my car sustained only minor damage?

A: Documented studies done by specialists Charles Carroll, M.D., Paul McAtee, M.D., and Lee Riley, M.D. revealed that:

“The amount of damage to the automobile bears little relation to the force applied to the cervical neck (spine) of the occupants.”

In other words, the severity of the injury to the passengers is not necessarily directly related to the damage to the vehicle. Most insurance adjusters love to convince you differently. **BE CAREFUL!!!**

Q: I definitely feel injured from my accident; however, I have a history of related types of aches and pains, and records of treatment. Does this harm my case?

A: No. This is why you need to see a specialist who is familiar with this circumstance. There is always a reason why you may feel injured or differently following an auto accident. Our job is to identify specifically your new injury or the flare-up of an old one.

Q: Do I need an attorney?

A: It is always important to take care of your well being as soon as possible. First priority is to get checked by a doctor and getting, if needed, the appropriate treatment. After that, you will have enough information to decide if you want to hire an attorney or not.

Remember, the insurance company has many attorneys working for them, usually very good ones at that. You may need all of the protection you can get. This can be done before or after treatment. If necessary, we can refer you to a reputable and qualified attorney.

Q: If I need treatment for any injury sustained, do I have to pay for it myself as the treatment is rendered?

A: No, only in extremely rare circumstances does the patient pay for the care s it is rendered. No matter who is at fault in the accident, you are still entitled to benefits under your car insurance policy. We can assist you in obtaining your benefits of your auto insurance. Using your insurance for this accident **WILL NOT** raise your rates. **THIS IS A FLORIDA LAW!** We also accept an attorney “lien” on your case. This allows you to get treatment and then have the bill paid when your case has been settled. Again, feel free to call, we can help you with this information.

Q: Does your treatment hurt?

A: Absolutely not. We specialize in advanced care for both children and adults. My therapies are very quiet and gently soothing. Most patients can hardly wait to get their care. Please see the “Patients Speak Out” section.

Q: Is your care safe?

A: Yes, **EXTREMELY!!!** Particularly when compared to the side effects of overly prescribed medications and/or inappropriate use of surgery.

OUR PATIENTS SPEAK...

“I was skeptical about Chiropractic until I received treatment. My range of motion has improved as well as my discomfort!”

-Paul Z.

“Chiropractic has aided me very much. It was hard to live, move, walk, and eat! I now have a lot of improvement, & more energy. I am able to do more things: I can sit better, stand with my back against the wall. I can eat better!”

-Nancy P.

“Chiropractic has aided me tremendously. I have less pain, increased mobility and more energy which has led to a more active lifestyle. I just feel better. It’s GREAT! I just didn’t realize it worked as well as it does!”

-Paula M.

FLORIDA CHIROPRACTIC CLINICS

**5290 Seminole Blvd. Suite A
St. Petersburg, Fl. 33708
(727) 398-2988**

(Spinal-Injury & Rehab.....Manual Muscle Testing for Auto Accident Injuries)

If you call one of our offices by _____ you will receive, at **NO COST TO YOU!**, a complimentary consultation, and Manual Muscle Test to evaluate for hidden injuries that need to be documented, and if appropriate, begin a course of action to treat the injuries. The test regularly exceeds \$180.00

Simply let one of our offices know you received this special report and would like to take advantage of this opportunity.

Yours in Health,

Dr. Greg Yingling

If you were not alone in the vehicle during the accident, the other people involved may want to be evaluated also. If there were more people involved, let our office know and we will honor the same FREE opportunity to them.

This is a No Obligation Offer. Any additional care must be agreed upon by both parties!
